## About

June 18, 2013 saw the opening of Infoversum, the first full dome 3D theatre in the Netherlands. The heart of the attraction is a 360-degree dome theatre that is equipped with an IOSONO immersive sound system.

Visitors enjoy films taking them to space, to the bottom of the ocean or back in time and experience a new dimension of movies, getting immersed in the sounds, images and stories. The dome theatre was equipped by Sky-Skan.

## Technical specification

**Processor:** IOSONO Spatial Audio Processor IPC100

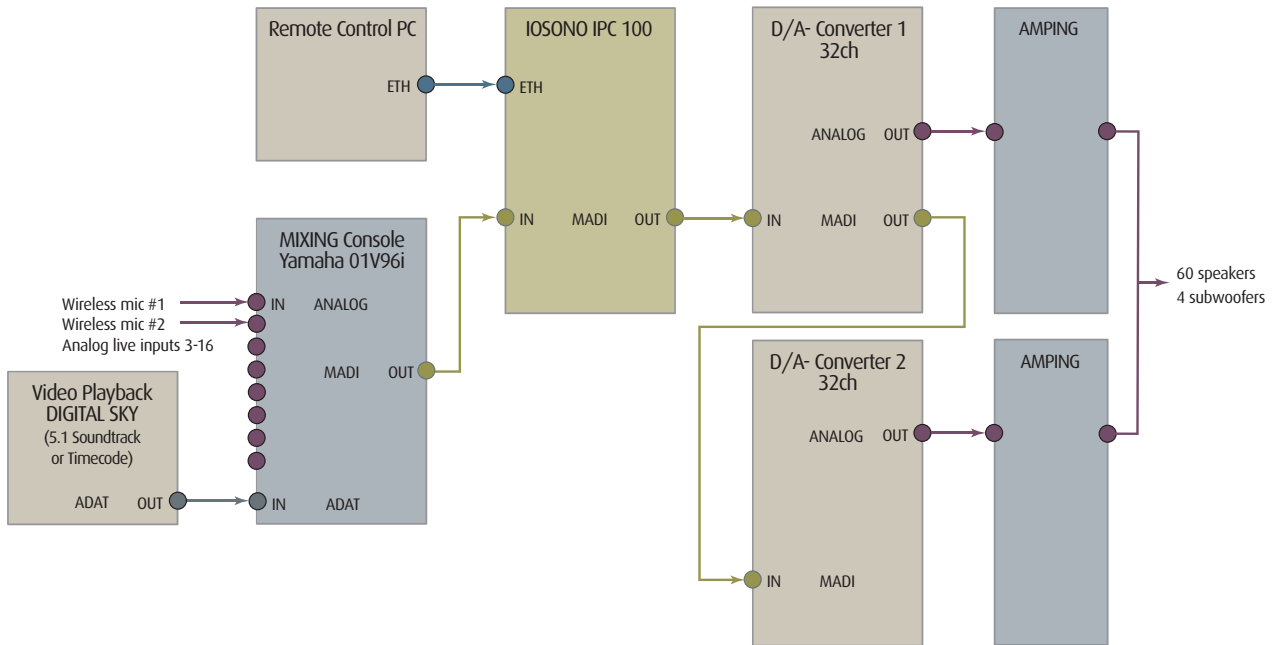

**60 speakers in a dome-shaped grid**  
type: QSC K8

**4 subwoofers**  
type: QSC KW 181

## System setup

## Signal flow chart

- TCP NETWORK (CAT5e)
- ADAT
- MADI OPTICAL (Fiber 50/125um)
- ANALOG

## Impressions

Find out more at <http://bit.ly/infoversum>

## Special feature

- dome theatre offers seating for an audience of more than 260
- system can also be used for live events (i.e. live band, speech)
- for receptions, concerts or other events, the seats can be removed to offer room for a standing audience of 400

“We have often used IOSONO sound systems for our high-end dome projects in the past. It’s an important addition to the visual technology we offer and guarantees a captivating visitor experience in all situations.”

Glenn Smith  
Managing Director, Sky-Skan Europe .
